RE: "Card in Hand" Requirement for Renewal

DATE: 16 January 2015

Just as many of our system providers require their employees have "card in hand" in order to work, REMSA's protocol for paramedic reverification and MICN reauthorization has, for many years, been that renewing applicants must present their state license ("card in hand") for the new period prior to us processing their renewal.

We wish to alert all providers and applicants that this policy will now be strictly enforced and applications will no longer be processed based on State website licensure verification. All applicants must present their new state license (or a copy, if mailed) for their accreditation/authorization renewals to be processed.

Please contact me if you have any questions – (951) 358 – 5029.
